

Report of the Board of Consulting Engineers for the Panama Canal Volume 2 (Paperback)

By United States Board of Canal

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: .and for a traffic of about 35 million tons, 2,759 cubic feet per second. Without such gates the figures will be 2,122 and 3,492 cubic feet, respectively. On page 167 of Part II of the documents supplied to the Board will be found a table giving the monthly volume carried past Bohio for fourteen years. As the flow at Bohio is about six-tenths of that at Gatun, the volumes at the former to compare with the above figures are 1,125, 1,643, 1,257, and 2,095, respectively. It will be found that in no single rainy month did the measured flow fall below that requisite for a traffic of 10 million tons. Even for 35 million tons, using the interior gates, there would have been shortages only in three of the fourteen years, amounting to 28, 32, and 4 cubic feet, respectively, and these are more than covered...
