Excerpt: . . . form of the total output, bus on actual returns for all operators in Michigan who reported to the Federal Trade Commission during the period August-December, 1917 are as follows: run of mine, 40 per cent; prepared sizes, 37 per cent; slack, 23 per cent. If the entire output of the four operators had been sold at the prices established October 27, 1917, it would have brought them a sales realization of 3.10 per ton. Effective November 1917, a 45-cent increase in the price of noncontracted coal was lowered by Executive order to take care of an increase in the Wage Scale at that time. The average labor cost of the four operators in 1917 was 2.57 per ton, an increase of 62 cents over the average for April-October, 1917, but of only 23 cents over that of October 1917. As the...

Reviews

It is easy to read through easier to fully grasp. It had been written very completely and useful. I am pleased to let you know that here is the greatest book we have read during my personal life and could be the very best book for possibly.

-- Miss Marge Jerde

It is really a remarkable publication I actually have possibly study. It usually is not going to cost excessive. It has been written in an exceedingly basic way and is particularly only right after I finished reading this publication through which basically transformed me, affected the way I think.

-- Dr. Breana O'Kon
